

On-Demand Control (DCKV)

INTELLIGENT KITCHEN EXTRACTION TECHNOLOGY

What is Cheetah?

Cheetah is an intelligent demand control kitchen ventilation system designed to control the extract and air supply fans, always ensuring the run at the lowest speed to minimize energy usage.

The system uses steam, smoke and temperature to modulate the fan speeds based on the demand from the cookline.

Key Features

- Immediately start saving
- Live **energy saving data** & reporting
- **Remote** diagnostics
- Seamless **integration** in existing BMS
- **Retrofit** or **new build** solution
- **Noise reduction** from fans
- Approved and verified by **Energy Technology List**

Annual savings of **thousands of pounds**

Reduce fan consumption by up-to **80%**

Meet TM50 **NETZERO** targets with DW/172 standards

ROI in under **2 years**
