

Navigating New Products and Futurebuild Attendance

Welcome back to the ETL newsletter! As we gear up for Futurebuild 2024, we're excited to share updates and insights that showcase our commitment to advancing energy efficient technology. Meet us at Stand C11 in the Digital Arena at ExCeL London, from March 5th to 7th at Futurebuild 2024, where you can explore our latest offerings and engage with our team.

Here's what you can expect in this edition:

- Discover our [newly redesigned website](#), with an improved search functionality and new features such as feedback sections.
- Check out our two new products from Ziehl Abegg UK Ltd and Electrolux Professional.
- Learn about our collaboration with Eurovent Certita Certification aimed at promoting energy performance and supporting certified manufacturers.

Don't miss out on these exciting updates! Join us at Futurebuild and let's pave the way towards a more sustainable future together.

Join Us at Futurebuild 2024

The ETL is excited to announce our presence at Futurebuild 2024 from March 5th to 7th.

We invite manufacturers and purchasers attending to connect with us at Stand C11 in the Digital Arena. Learn how the ETL can enhance visibility for your energy-efficient products. Visitors will also have a chance to be featured in our latest videos. To register and attend Futurebuild, [click here](#).

ZIEHL-ABEGG

New Ziehl Abegg UK Ltd Product Addition

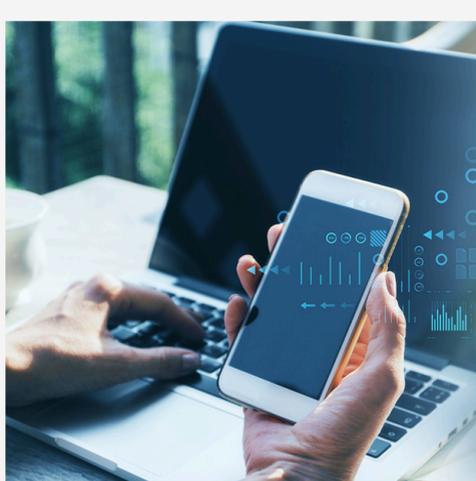

We are pleased to announce that Ziehl Abegg UK Ltd has just listed their first product - the [ZBluefin](#) - in the Commercial Fans sub-technology within the [Motors, Drives & Fans](#) category. They said:

"As one of the leading global companies in the field of ventilation, control and drive technology, a history spanning over 100 years, Ziehl Abegg continues to be at the forefront of innovation and technology. Ziehl Abegg products aligned perfectly with the ETL "best in class technology philosophy".

New Electrolux Professional Product Addition

Another recent addition is Electrolux Professional's [ecostore HPe](#) product within the [Professional Refrigerated Storage Cabinets](#) sub-technology.

They had this to say: "As a respected, objective platform, the ETL provides validation to customers of the energy efficiency of Electrolux Professional Group equipment, and our position as one of the leading global providers of food service, beverage, and laundry for professional users. Our innovative products make our customers work-life easier, more profitable – and truly sustainable every day."
