

Enhancing your energy efficiency journey with our latest updates

Welcome to this edition of the ETL Newsletter.

This month, we spotlight the collaborative efforts of the ETL and Eurovent Certification to enhance energy efficiency in Refrigerated Display Cabinets (RDCs). We also explore insights on Building Information Modelling (BIM) in construction in our first instalment of the ETL series. In addition, we report on how Greene King saves with ETL-listed products at the Punch and Judy pub. We also showcase new additions from UNOX UK LIMITED, RATIONAL UK LIMITED, and Electrolux Professional. Plus, learn how to maximise your ETL listing and provide feedback to help us improve.

Don't forget to check out our [YouTube](#) channel for new shorts and in-depth videos on ETL events and helpful guides.

Stay tuned for more updates such as a new round up article and video focused on the ETL's time at the InstallerSHOW 2024, a second BIM article, and a brand new ETL category – coming to you soon!

RDCs and the ETL-Eurovent Certification collaboration

[Learn how our collaboration helps](#) to advance energy efficiency in Refrigerated Display Cabinets (RDCs). With 131 ETL-listed RDCs optimised for energy savings, this partnership streamlines certification processes, benefiting manufacturers with reduced testing requirements and purchasers with assured energy performance. Retailers, facing significant energy costs, can confidently choose from top-tier energy-efficient models, fostering sustainability and financial savings.

What is Building Information Modelling (BIM) and why it matters

Discover the potential of BIM in the first instalment of the ETL series. From design to lifecycle management, BIM enhances efficiency, collaboration, and sustainability in construction. By integrating data into 3D models, BIM ensures seamless updates and coordination. Learn how the ETL aligns with BIM, drives energy efficiency and supports the UK's Net Zero goals. [Click here](#) to dive into the world of BIM and its benefits for your projects.

Greene King pub saves with ETL listed products

[Discover how Greene King](#) is improving their energy efficiency with ETL listed Rhino products at the Punch and Judy pub in Covent Garden, London. By switching to Rhino bottle coolers, Greene King has slashed electricity costs by £2500 annually, all while ensuring drinks are served at optimal temperatures. These coolers consume just 0.81 kWh/24 hours, significantly less than their predecessors, marking a major win for sustainability and operational savings.

First product on the ETL from UNOX

UNOX UK LIMITED have added their first product: the [CHEFTOP MIND.Maps™ PLUS COUNTERTOP Electrical Combi-Steam Professional Oven](#) in the Professional Foodservice Equipment category. They had this to say: "We are delighted to announce that Unox products are now included in the UK Government's Energy Technology List. Sustainability and greener choices are crucial for our customers when purchasing kitchen equipment. At Unox, energy efficiency is central to our product development, and we are committed to driving industry sustainability."

New additions from RATIONAL

RATIONAL UK LIMITED have added five new Combination Steam Ovens in the Professional Foodservice Equipment category. The complete browse list with their products is [available here](#). They had this to say:

"RATIONAL are the market leader in the combi-steamer market and we are very pleased to be part of the programme supporting the ETL in highlighting the leading energy efficient cooking systems."

Six new additions from Electrolux Professional

Electrolux Professional have just added six new Professional Refrigerated Storage Cabinets to the ETL in the Refrigeration Equipment category. This is following up on their listing earlier this year in the same category. Readers interested in learning more about these new additions can find product specifications [here](#).

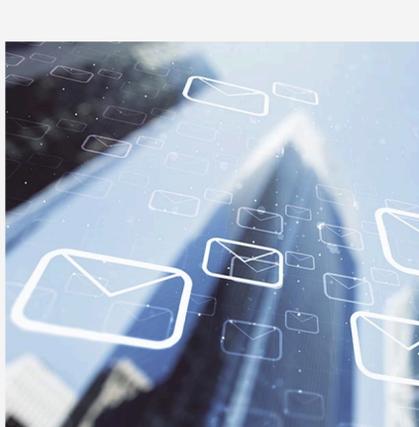

Maximise your ETL listing: The manufacturer's guide

Being listed on the ETL is just the beginning! With around 8,000 rigorously tested energy efficient products, the ETL is the UK's leading database for top-performing energy-saving technologies. Enhance your product's visibility and build trust with our ETL mark. Downloadable logos and promotional tips are available to help you leverage your ETL accreditation across your marketing channels. [Learn how to connect with more purchasers](#) and showcase your energy-efficient innovations.

Specialised help for purchasers

Purchasers can browse and compare around 8,000 independently verified and accredited energy efficient products, across multiple categories. Want to know more about how to search for a product or what the benefits of the ETL are? Learn more by watching our ["How-to" videos](#) or read our [FAQs](#).

Also see our [Products page](#) where you can find all ETL accredited products.

Share your feedback and help us improve

Got a minute to share your thoughts? Help us enhance the ETL website by filling out our quick survey. Your feedback is invaluable in making our platform more useful for you. [Click here](#) to complete the survey and provide star ratings for specific pages. Your input will directly contribute to improving our services.

Thank you for helping us make the ETL better!
